

ACTUAL PHOTO REFERENCE OF OUR GO-LESS INGREDIENTS

GO-LESS®

You don't have to run run run, you can simply Go-Less®

Go-Less® is a clinically researched natural solution that provides support for bladder wellness in both men and women.

MANUFACTURING AND PROPERTIES

IFF Health uses the proprietary EFLA®HyperPure technology that ensures highly selective removal of fat-soluble components from the extract, providing increased stability, solubility, and absence of rancidity.

SCIENCE

Human clinical studies demonstrate that Go-Less® supports urinary bladder function and addresses urinary urgency in both men and women.

Product category |
INTIMATE

PRODUCT ATTRIBUTES

- A clinically researched natural solution for bladder wellness
- Efficacy and safety supported by published clinical studies
- Positive effects demonstrated in both men and women
- Consumer satisfaction proven
- Proprietary EFLA®HyperPure production process

As shown in a randomized placebo controlled trial and three open label studies, Go-Less® statistically significantly reduced:

- ✓ Urination frequency
- ✓ Nocturia frequency
- ✓ Frequency of urgency

Participants demonstrated a high degree of satisfaction in all studies.
